Student Graduation

Guidelines

- **Try to answer the questions in front of a mirror or maybe a fellow SE Factory colleague**
- **Try to keep the answers short and not more than 10 seconds for each response**
- **Be creative !!**
- **Last but most importantly, be yourself … Everyone else is taken!**

The questions

1. My name is [...] and I'm an SE Factory graduate
2. What are you doing here today?
3. Summarize your project in one sentence.
4. What is your favorite thing about yourself?
5. If you were a coding language what would you be?or If you had to choose one language for the rest of your life what would it be and why?
6. What is your biggest nightmare about being a developer?
7. What is your favorite thing about being a developer?
8. If you were just given 10 million dollars, what's the first thing you would buy?
9. If you were to win a prize in your field, who would you dedicate it to?
10. Name three things that would make the workplace a better place
11. A message to your future employer

Bonus Question: If you create one more function to the AI world what would it be?
